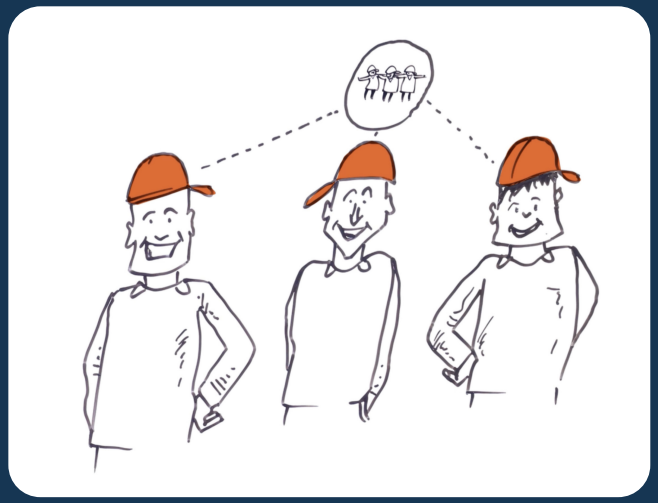
BRAIN BASED SAFETY

SURVEY

Grip starts with understanding what drives people!



Gain insight into how behavior is formed, and learn how to influence it.

HET RAPPORT

Theory
Receive a short, clear explanation of the Brain Based Safety theory that provides context for the survey questions.

Research results
Discover how your organization scores per theme. Identify outliers and patterns across teams.

Conclusions & recommendations
See where the biggest opportunities lie. Build on strengths and gain more grip on behavior and processes.

Discussion points
Use the practical worksheets to start the conversation. Translate insights directly into action within your team.

- Easy to complete via computer or smartphone
- Completely anonymous
- Completion time: 10 to 15 minutes
- Available in multiple languages
