BRAIN BASED SAFETY

MANAGEMENT TRAINING

Grip on behavior starts with leadership!

This training program helps leaders understand, embody, and translate the philosophy into tangible behavior.

THE TRAINING

- Provides insight into how behavior is formed
- Translates theory into practical leadership
- Includes inspiring cases and exercises

THE RESULT

- Creates role-model behavior at all levels
- Ensures a top-down integration of the philosophy
- Builds a shared language to understand and improve processes
- Raises awareness of how safety, quality, and results are connected
- Improves the safety culture
- Provides understanding of how process control emerges through the interaction of several key principles
- Builds an organization where safety and conscious behavior become second nature

FULL PACKAGE

- 10 half-days
- All topics explored in depth
- Includes the book ‘Grip on Behavior’
- Optional: step-by-step translation of survey results into a shared action plan

MEDIUM PACKAGE

- 5 half-days
- Summary of the key theories
- Includes the book ‘Grip on Behavior’

COMPACT PACKAGE

- 2 sessions of 5 hours
- The essence of Brain Based Safety in a nutshell
